DETAILED ACTION

Information Disclosure Statement

1. The Office Action cited in the information disclosure statement filed 09/01/2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it is not in English. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Response to Arguments

2. Applicant's arguments filed 04/27/2006 have been fully considered but they are not persuasive.

The Applicant contends, "Accordingly, as noted in FIG. 14, the sectors 11 of the different sub-blocks 23A and 2313 are not adjacent to each other for they are separated by an inner code parity 15A. The only sectors adjacent to each other are Sector 0, Sector 2, Sector 4, etc., in sub-block 23A, however these are sectors belonging to the same sub-block. Similarly, Sector 1, Sector 3, Sector 5, etc., in sub-block 2313 are

Application/Control Number: 10/828,297

Art Unit: 2133

adjacent to each other but also belong to the same sub-block. Therefore, assuming that each sector were to have an identifier, then the identifier of Sector 0 belonging to first sub-block 23A, would not be adjacent to the identifier of Sector 1 belonging to the second sub-block 2313, since the identifiers of Sectors 0 and 1 are separated by the inner code parity 15A".

The Examiner disagrees and asserts that Figure 14 of Noda is an intermediate Error Correction Block for demonstrating the structure of the Error Correction Blocks. Figure 7 of Noda teaches that prior to recording a recording sector is comprised of 1 byte of outer code parity and 10 bytes of inner coder parity. That is 1 byte of outer code parity and 10 bytes of inner code parity are added to each of the logical sectors 0-31 in Figure 14 to form 0-31 recording sectors. The recording sector 0 is adjacent to recording sector 1 and so on and so forth. Noda explicitly teaches an interleaver which extracts and arranges the identifiers for each recording sectors 0-31 from ones of the ECC blocks 23A and 23B to generate a recording block 23 such that adjacent identifiers of the recording sectors are of different ECC blocks.

The Examiner disagrees with the applicant and maintains all rejections of claims 9 and 11-16. All amendments and arguments by the applicant have been considered. It is the Examiner's conclusion that claims 9 and 11-16 are not patentably distinct or non-obvious over the prior art of record in view of the reference, Noda; Chosaku (US 6175686 B1) as applied in the last office action, filed 01/31/2006. Therefore, the rejection is maintained.

Art Unit: 2133

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Noda; Chosaku (US 6175686 B1).

See the Non-Final Action filed 01/31/2006 for detailed action of prior rejections.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 provisionally rejected on the ground of nonstatutory double patenting over claims 1-10 and 34-43 of copending Application No. 10/124366. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

See the Non-Final Action filed 01/31/2006 for detailed action of prior rejections.

5. Claims 1-11 provisionally rejected on the ground of nonstatutory double patenting over claims 1-10 and 34-43 of copending Application No. 10/828298. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

See the Non-Final Action filed 01/31/2006 for detailed action of prior rejections.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2133

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Torres whose telephone number is (571) 272-3829. The examiner can normally be reached on M-F 8-5. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on (571) 272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
